DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/10/07 has been entered.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2,9-12, 16, 20, 24, and 25 remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-7, 9, and 10

of U.S. Patent No. 6,291,667 in view of Uchida et al [US 6,150,092]. This rejection is maintained for the same reasons set forth in the official Action mailed 7/11/06.

In applicant response filed 8/10/03 it was requested to hold the rejection in abeyance until allowable subject matter is indicated. This rejection is maintained as applicant has provided no argument indicating that the rejection is improper.

Claims 2, 9-12, 16, 20, 24, and 25 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida et al [US 5,150,092], and Robinson et al [US 5,814,620; 5,710,136; 5,801,156]. This rejection is maintained for the same reasons set forth in the Official Action mailed 7/11/06.

Applicant has added the limitation "wherein said antisense oligonucleotide inhibits proliferation of Kaposi's Sarcoma cells". It is noted that this limitation adds no structural requirements to the claim but asserts the properties of the claimed oligonucleotides. Applicant argues that one must have a reasonable expectation of success, that the cited references do not inherently teach the claim limitation and the fact that a certain result or characteristic may occur or be present in the prior art is not sufficient to establish the inherency of that result or characteristic. It is noted that the previous Official Action and those before it clearly set forth the motivation and reasonable expectation of making the claimed antisense oligonucleotides. One in the art need not have known or appreciated that these oligonucleotides may inhibit Kaposi's sarcoma. In fact no knowledge of the property was relied on, nor was it needed to make

the prima facie case of obviousness of record. Applicant's amendment to the claims does not limit the structures in the claims and therefore providing a subgenus of the previously claimed oligonucleotides. The limitation provides a description of a latent characteristic of the claimed genus of antisense oligonucleotides. Applicant is directed to the detailed arguments of the examiner set forth in the previous Official Action.

All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
